How to use your idea cards

No more 11 p.m. panic scrolling. Pick your ideas in advance, write them on the December planner, and keep the cards next to your bed. Every setup takes about five minutes and uses things you already have.

1. **Plan in one sitting**
   Choose 24 ideas and write the numbers on the December planner. Save the easiest ones for busy school nights.
2. **Cut out the props**
   The elf-size signs make any setup look finished. Print them on card stock and fold them into little tents.
3. **Set a reminder**
   A 9 p.m. phone alarm is the best elf helper ever invented.
4. **Keep it kind**
   Pair a setup with a small kindness mission. The kids will remember how it felt, not how fancy it was.

Safety first

Keep scissors, small candies and string out of reach of little children. Adult setup only.

Good to know

"Christmas Elf" is a generic name for this activity. Not affiliated with any elf doll brand: use any toy you have.
